Najiyah S. Williamson

najiyah.williamson@gmail.com | 845-699-5844 | www.linkedin.com/in/najiyah-williamson

Summary

Epidemiology professional specializing in data science, geospatial analysis, environmental health research. Experienced in statistical modeling, GIS, and data visualization to analyze environmental and public health relationships, with research interests spanning environmental exposures, infectious diseases, and chronic health outcomes.

Skills and Qualifications

- **Programming:** R, SAS, Python, SQL, Github
- **GIS:** ArcGIS Pro and Online (StoryMaps, Survey123, Dashboards); GIS in R
- **Data Visualization:** Power BI, Canva
- **Microsoft Office:** Word, PowerPoint, Outlook, and Excel
- **Research and Analysis:** Statistical analysis, academic writing, Qualtrics
- **Collaboration and Communication:** Cross-team research collaboration; translating technical findings for non-technical audiences.

Experience

Neurodevelopment Data Analyst – *Emory University*
April 2025 – *Present*

- Leading a study investigating how prenatal pesticide exposure and maternal stress jointly affect early childhood brain development in the South African Drakenstein Child Health Study (DCHS) .
- Apply statistical and data science methods (self-organizing maps, quantile g-computation, weighted quantile sum regression) to analyze 10 pesticide biomarkers and 12+ MRI outcomes.
- Managing interdisciplinary collaboration with 6+ authors and preparing manuscript for academic publication.

Wastewater Surveillance Implementation Analyst - *WastewaterSCAN*
October 2024 – *Present*

- Created an adapted framework to characterize and assess barriers faced by utilities and public health agencies involved in wastewater surveillance.
- Exploring how engagement in wastewater surveillance programs may fluctuate based on the specific disease or target being monitored using survey design with Qualtrics.
- Analyzing both quantitative and qualitative data from 30+ states about their involvement in wastewater surveillance implementation using RStudio and GitHub.

Environmental Epidemiology Research Assistant - *HERCULES Exposome Research Center*
August 2024 – February 2026

- Characterized heat-related symptoms and social determinants experienced by emergency department patients to examine the effects of heat stress.

- Developed an asset guide for a community-based organization to provide access to public health resources in local communities.
- Analyzed data on housing code violations from 50+ cities across the United States to identify the relationship between housing complaints and health outcomes using RStudio.

Public Health Intern – *Leidos*
June 2025 – August 2025

- Collaborated with LEAD Agency and the CDC Foundation to develop an ArcGIS StoryMap highlighting environmental justice and public health challenges in northeastern Oklahoma.
- Conducted interviews and collected local data to map climate-related health threats including toxic metal contamination and flooding using GIS tools.

ArcGIS Volunteer – *Children's Environmental Health Network (CEHN)*
May 2025 – September 2025

- Designed and deployed an ArcGIS Survey123 tool to collect geospatial data on events, activities, and proclamations for CEHN's Children's Environmental Health Day initiative.
- Built interactive maps and dashboards with filters and search functionality to enhance public accessibility and visualize nationwide engagement in a centralized platform.

GIS Mapping and Data Analyst Intern – *Conscious Kitchen, Turning Green*
February 2025 – June 2025

- Developed a user-friendly ArcGIS map of organic farms across California's 58 counties to strengthen supply chain for school districts and promote access to organic produce.
- Conducted data cleaning and analysis using Excel and RStudio to manage GIS datasets.
- Created outreach materials addressing environmental justice and social determinants of health.

Certifications

CITI Program Certification – Biomedical Research
Issued September 2024 · Expires September 2027

CITI Program Certification – Social & Behavioral Research
Issued July 2024 · Expires July 2027

Education

Rollins School of Public Health, Emory University — Atlanta, GA
Master of Public Health, Environmental Health and Epidemiology — Expected May 2026
Data Science Certificate

State University of New York (SUNY) at Oswego — Oswego, NY
Bachelor of Science, Biology; Minors in Psychology and Health Science — May 2024
Summa Cum Laude
